SECURITY FENCING

Keep your family safe

Aussie Fencing's range of Security Fencing has been constructed using the finest quality materials in our state of the art manufacturing plant.

Our Garrison Fencing is made from pre-galvanised steel. After fabricating the panels, they are treated and powder coated with a high grade Interpon powder. This adds an extra layer of protection. Welds are silicon bronze for even more rust resistance. Topped with strong pressed spears, our garrison fencing offers both a visual and physical deterrence to potential thieves.
